Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming is a collaborative technique that fosters a free and open environment where every team member is encouraged to contribute ideas without fear of criticism. It promotes creative thinking by emphasizing the generation of a large number of ideas before evaluating their quality. Innovative and unconventional suggestions are welcomed, expanded upon, and refined through teamwork. This collaborative approach helps teams explore diverse perspectives, uncover creative solutions, and effectively address problems. Use this template to facilitate productive brainstorming sessions, enabling your team to generate, organize, and develop ideas seamlessly, regardless of whether members are working together in person or remotely.
